Public consultation on EU funds in the area of investment, research & innovation, SMEs and single market

Introduction

'A stronger Union needs to be equipped with appropriate financial means to continue to deliver its policies. The Union has changed fundamentally in recent years, as have the challenges it faces. Our Union needs a budget that can help us achieve our ambitions. The Multiannual Financial Framework for the period after 2020 must reflect this.' (Commission Work Programme 2018)

The EU budget currently amounts to less than 1 euro per citizen per day. Although a modest budget, at around 1 % of the EU's gross national income or 2 % of all EU public spending, it supports the EU's shared goals by delivering essential public goods and tangible results for EU citizens. These include: investing in skills, innovation and infrastructure; ensuring sustainable food systems and developing rural areas; ensuring a clean and healthy environment and the protection of natural resources; promoting joint research and industrial projects; funding shared activities in the field of migration and security; and supporting development and humanitarian aid.

The current Multiannual Financial Framework — the EU's long-term budget — runs until the end of 2020. In 2018, the Commission will put forth comprehensive proposals for the post-2020 Multiannual Financial Framework and for the next generation of financial programmes that will receive funding. These programmes/funds provide financial support to hundreds of thousands of beneficiaries such as regions, towns, NGOs, businesses, farmers, students, scientists, and many others.

The Commission's proposals will be designed to make it possible for the EU to deliver on the things that matter most, in areas where it can achieve more than Member States acting alone. This requires a careful assessment both of what has worked well in the past and what could be improved in the future. What should the priorities be for future policies and programmes/funds? And how can they be designed to best deliver results on the ground?

As an integral part of this process and following on from the [Reflection Paper on the Future of EU Finances](#), the Commission is launching a series of public consultations covering all the major spending areas to gather views from all interested parties on how to make the very most of every euro of the EU budget.

The EU has developed a variety of instruments to stimulate investment and entrepreneurship to create jobs and growth. The Investment Plan for Europe, the so-called Juncker Plan, aims to unlock investment throughout Europe through to the European Fund for Strategic Investments (EFSI), which provides a EU guarantee to mobilise investment. The EFSI also complements other existing instruments like COSME that make it easier for small and medium-sized enterprises (SMEs) to access finance in all phases of their lifecycle – creation, expansion, or business transfer. Through EU support, businesses have easier access to guarantees, loans and equity capital.

Research and innovation are instrumental for addressing the EU's productivity gap and play a crucial role in providing solutions to many global challenges the EU and its citizens are facing today. In that context, the EU has made a major contribution with the Horizon 2020 programme.

The European Single Market is one of the EU's greatest achievements. It has fuelled economic growth and made the everyday life of European businesses and consumers easier. A well-functioning Single Market, including in its digital dimension, stimulates competition and trade, improves efficiency, raises quality, and helps cut prices. In that context, the EU has set up several programmes in a wide range of areas (health, food safety, customs...) to facilitate the free circulation of goods, services, capital and persons across the European continent.

Recent consultations already covered several policy areas, including on current performance and future challenges. The views already expressed by stakeholders in these consultations will be taken into account as part of the current process for the future MFF.

* 33 To what extent do the current programmes/funds add value, compared to what Member States could achieve at national, regional and/or local levels?

- To a large extent
- To a fairly good extent
- To some extent only
- Not at all
- Don't know

34 Please specify how the current programmes/funds add value compared to what Member States could achieve at national, regional and/or local levels. Please clearly indicate to which policies, programmes and funds your answer refer.

1500 character(s) maximum

The EU programmes/funds add the most value on topics that have an impact on the entire European Union or topics where the Member States share common issues or concerns. Example of such topics are Facilitating a Transition to a Low Carbon and Circular Economy, Ensuring a Clean and Healthy Environment, the Protection of Nature, and Ensuring Safe and Sustainable Transport. The LIFE and Horizon 2020 funds are crucial to these topics and really add value in comparison to what Member States can achieve solely at a national or "divided" level. The EU both promotes and facilitates international research, which helps EU countries to share ideas so that academics and researchers learn from one another. The EU funds also reflect shared principles of Europe and can protect what is most valuable to countries.

35 Is there a need to modify or add to the objectives of the programmes/funds in this policy area? If yes, which changes would be necessary or desirable? Please clearly indicate to which policies, programmes and funds your answer refer.

1500 character(s) maximum

The EU has helped countries and regions to protect nature via the LIFE funds. This should only grow in future spending plans. It is one of the greatest achievements to date of the European Union.

Coordinating efforts on transport projects (Horizon 2020, CEF, and ESIF) would go a long way towards making transport spending have more EU-added value without being large international infrastructure projects. Joint procurement could be fostered so that cities, regions, and countries could apply for EU funds that have been earmarked for transport to spend on cleaner transportation. A research budget in the broad area of climate change is also crucial with some of that fund allocated to the transport sector, which is Europe's biggest climate problem.

Furthermore, regarding transport research and research in general, there should be an online space for anyone to voluntarily suggest ideas for research topics that could then be reviewed by the European Commission and selected to become research topics on future calls for tender. The reason why such a space is necessary is to avoid research topics being suggested only by large industry actors but also to expand the pool of people where the research ideas come from.

36 The Commission has preliminarily identified a number of possible obstacles, which could prevent the current programmes/funds from achieving their objectives. To what extent do possible obstacles prevent the current programme/funds from achieving their objectives?

The EU budget invests a lot into research via Horizon 2020. The research topics are defined at Commission level and then "teams" of applicants can apply to receive such funds. An online space where academics, NGOs, or any individual citizen could recommend research topics could help the EU to find new ideas that they had not thought of. Recipients of the EU research budget should be prioritized for civil society and academic institutions - the fact that large companies receive a lot of the research budget from the EU is understandable but important to monitor. There is a crucial need for balance between nudging companies to research the right things and offering a handout to companies for research that they could have done without such limited public resources. When money is given to companies, it should be ensured the projects go beyond "demonstration" and lead to real world implementation of new solutions. There should also be a clause that any marketing at all done by companies on something that came as the result of receiving EU funding should be obliged to use the EU logo.
