

# Biodiesel production in Germany

Ten years of RED - Germany biodiesel data

July 2020

## 1. Biodiesel in Germany has increased in the past decade

Since the Renewable Energy Directive (RED) was adopted in 2009, the consumption of food and feed based biodiesel (based on vegetable oil) has increased. This is a result of the targets set in the RED, specially the target for renewables in transport (10% by 2020).
