

# Biodiesel production in Italy

Ten years of RED - Italy biodiesel data

July 2020

## 1. Biodiesel in Italy has increased in the past decade

Since the Renewable Energy Directive (RED) was adopted in 2009, the consumption of food and feed based biodiesel (based on vegetable oil). This is a result of the targets set in the RED, specially the target for renewables in transport (10% by 2020).
