

Public consultation to support the evaluation of the European Environment Agency (EEA) and its European Environment Information and Observation Network (EIONET)

Fields marked with * are mandatory.

Introduction

The [European Environment Agency \(EEA\)](#) is an agency of the European Union, which relies on a network of several hundred organisations across EU member States and other member and co-operating countries, the European Environment Information and Observation Network (**EIONET**).

The objective of the EEA and EIONET, as set out in the founding regulation, is "to provide the Community and the Member States with objective, reliable and comparable information at European level enabling them to:

- *take the requisite measures to protect the environment;*
- *to assess the results of such measures; and*
- *to ensure that the public is properly informed about the state of the environment.*

To this end, the EEA and EIONET also provides technical and scientific support."

This open public consultation is part of a wider consultation exercise that also includes targeted surveys, interviews and focus groups with selected stakeholders. This part of the consultation will provide crucial information with regards to the perceived performance of the EEA and EIONET.

The questionnaire is divided into two sections. In the first section you are asked to answer some questions on your profile and personal details. The second contains questions concerning the EEA and EIONET.

Part 2: How useful is the information provided by the EEA?

This set of questions aims to assess the extent to which the information provided by the EEA meets the needs and expectations of those that use it.

The EEA gathers and provides information across a range of themes. Please select the themes which are associated with your needs.

(a) Environmental themes

Please select all that apply

- Air pollution
- Biodiversity
- Climate change impacts and adaptation
- Forests
- Freshwater quality
- Marine environment
- Mitigating climate change
- Noise
- Soil
- Waste

(b) Socio-economic dimensions

Please select all that apply

- Agriculture
- Building and infrastructure
- Consumption
- Energy
- Health and environment
- Industry
- Maritime activities
- Resource efficiency
- Tourism
- Transport

(c) Systemic perspectives

Please select all that apply

- Bio-economy
- Circular economy
- Green economy
- Hydrological systems and sustainable water management
- Land systems
- Natural capital and ecosystem services
- Sustainable development
- The air and climate system
- Urban systems
- Other

*** We are interested why individuals and organisations use EEA products and services. Please select the statements below that best describe your needs**

Please select all that apply

- I use EEA products and services for work purposes
- I use EEA products and services for purposes unrelated to my work
- I have an interest in aggregated environmental information across Europe
- I have an interest in aggregated environmental information in specific regions of Europe
- I have an interest in comparing environmental information across countries
- I am only interested in the environmental information for one particular country
- The information that I use is only available from the EEA
- I use information from the EEA in combination with information from other sources
- The information that I use is available from other sources as well as the EEA, but I prefer to use information provided by the EEA
- Other, please explain

*** How interested are you in information provided by the EEA relating to European countries outside of the EU?**

The EEA's membership is broader than that of the EU.

The 33 member countries include the 28 European Union Member States together with Iceland, Liechtenstein, Norway, Switzerland and Turkey.

The six West Balkan countries are cooperating countries: Albania, Bosnia and Herzegovina, the former Yugoslav Republic of Macedonia, Montenegro, Serbia as well as Kosovo under the UN Security Council Resolution 1244/99

Part 3: Performance and value-added of the EEA and Eionet

The EEA and EIONET carry out a range of functions. These include:

1. Publishing a European State of the Environment Report every five years
2. Undertaking thematic assessments of the state of the environment in selected sectors and themes
3. Setting up criteria and indicators for measuring the state of the environment in different sectors and themes across Europe
4. Ensuring a broad dissemination of environmental information to the general public
5. Managing environmental monitoring and reporting data
6. Providing environmental data and information to support policy development at EU and national level
7. Supporting European-level knowledge creation and exchange among institutions and organisations dealing with environmental information and knowledge
8. Providing analyses of long-term economic, social and environmental megatrends

Has The EEA/Eionet performed its various functions in a competent manner?

In the following table, you are asked to state your opinion on whether The EEA/Eionet has performed the listed functions in a competent manner
